

APPLICATIONS

SECURITY

You want to hide something? Put it on an open place!

By using our instruments it is possible – signals are indistinguishable from the natural fluctuations of the natural background radiation or simulates some natural processes.

You want to detect something hidden?

Use our sensitive and smart sensors – we can detect single photon!

**WE MAKE VISIBLE THE INVISIBLE
AND INVISIBLE THE VISIBLE**

APPLICATIONS

SECURITY

DETECTION & IDENTIFICATION OF THE OBJECTS

Analysis of the dynamics of spectral images.

Main properties:

- completely hidden passive detection
- the ability to detect and identify in the high level of noise and interference

**WE MAKE VISIBLE THE INVISIBLE
AND INVISIBLE THE VISIBLE**
